ABOUT ME

I'm a front-end developer specializing in React and Next.js. I have hands-on experience building modern web apps with HTML, CSS, JavaScript/TypeScript, and tools like Tailwind CSS. I'm passionate about writing clean, scalable code and delivering polished UI experiences.

PROJECTS

The Wild Oasis admin side

Complete fullstack hotel staff app for tracking customers. Initially built with React, JavaScript, Styled Components with no responsive design, and Supabase. Later improved with NextJS, server actions, Prisma, and PostgreSQL. Supabase now handles images only. Secured with Zod, using SSG/ISR for performance. Optimistic UI applied throughout, clearly visible on the cabins page.

SKills displayed in this web application

NextJS, Tailwind CSS, TypeScript, Zod, SEO, SSG, ISR, authentiaction, optimistic UI, git/github, vercel, performance optimization, responsive design, PrismaORM and PostgreSQL.

The Wild Oasis customer side

Complete full-stack app with NextJS, initially built with JavaScript, later upgraded to TypeScript. It stays in sync with the admin side of the application, utilizing both dynamic and static pages.

SKills displayed in this web application

NextJS, Tailwind CSS, TypeScript, Zod, SEO, SSG, ISR, optimistic UI, git/github, vercel, performance optimization, PrismaORM and PostgreSQL.

Overclocked

Overclocked is a simple, beginner-friendly web app for learning about computer parts like CPUs, GPUs, and RAM. An integrated AI chatbot, powered by the Groq API, lets you ask questions and get instant answers while you explore. Built with Next.js, TypeScript, and Tailwind CSS for a fast, modern, and responsive experience.

SKills displayed in this web application

NextJS, Tailwind CSS, TypeScript, git/github, vercel, Framer Motion, responsive design.
